Subject Index

Food Technology, Volume 52, 1998

The issue number appears in parentheses, followed by the page number.

Achievement Award winners
Appert Award, T.P. Labuza (8)82
Babcock-Hart Award, H. Mehansho (8)82
Chang Award, R.C. Lindsay (8)86
Cruess Award, R.W. Hartel (8)84
Fellers Award, R.G. Arnold (8)83
Industrial Achievement Award, National Starch and Chemical Co. (Novation™ Functional Native Starches) (8)91
Industrial Scientist Award, N.S. Singer (8)86
International Award, H.W. Ockerman (8)84
Loncin Research Prize, T.P. Labuza (8)91
Prescott Award, C.C. Akoh (8)83
Research and Development Award, T.R. Klaenhammer (8)88
Stier Award, R.M. Patrick (8)88
Willey Award, C.J. Bates (8)86

Agriculture
manufacturers must address the "front end" (11)26
minimal processing of produce (12)84

Alliances
economic reality drives industry–university alliances (7)58

Antioxidants
antioxidants take center stage (5)140
minimizing rancidity in muscle foods (10)54

Awards
Fellows of the Institute (8)94
IFT Achievement Award winners (8)82
World Food Prize awarded to seedsman (12)14

Back Page column
CAST weighs in on IFT's Guiding Principles for Food Safety Oversight (5)240
EPA's implementation of the Food Quality Protection Act (11)148
minimizing microbial hazards for fresh produce (12)140
no rejoicing with *Joy of Cooking* (4)140
phytochemicals: a potential new health paradigm? (9)168
President's Council on Food Safety (10)124
recruiting food scientists to lead the food sector in the next cCentury (2)104
regulating organic foods (7)144
Safe Food Act of 1997 (1)112
trans fatty acids: a health paradox? (3)120
unpasteurized Juice: why is FDA taking chances with food safety? (8)180
what's ahead for FDA's foods program (6)156

Bakery
ringing in the new year with innovative bakery ingredients (1)70

Beverages
American Soy Products expands soymilk facility (11)14
beer and wine making (4)86
beverage packaging (7)111
breaking with tradition (12)32
characterizing coffee beans with chromatography (2)75
cost of pasteurizing apple cider (1)50
got more milk? (2)22
new sweeteners redefine diet beverage market (9)26
science gives specialty juice a big slice of the market (11)44
sucralose approval sweetens low-cal market (5)34
unpasteurized juice: why is FDA taking chances with food safety? (8)180
we all scream for . . . green tea? (6)28

Biotechnology
French biotechnology companies seek American partners (6)64
that's using the old bean (6)42

Book reviews
(1)96; (3)101; (4)101; (5)202; (6)124; (8)159; (9)146; (11)126; (12)106

Breakfast foods
get up and go (2)24

Business/Marketing column
breaking with tradition (12)32
consumer approval of irradiated meat still tentative (1)24
global village struggles with open trade (10)28
got more milk? (2)22
it's show time! (7)26
job market, and Expo (8)28
new sweeteners redefine diet beverage market (9)26
putting the sizzle back in beef (11)28
sensory testing rediscovered as key to new product success (4)26
sucralose approval sweetens low-cal market (5)34
we all scream for . . . green tea? (6)28

CAST
CAST weighs in on IFT's guiding principles for food safety oversight (5)240

Chemistry
challenges to biocatalysis from flavor chemistry (2)40
chemical by-products of chlorine and alternative disinfectants (4)58
predicting the functionality of direct food additives (11)56
retention and release of aroma compounds in foods containing protein (5)68
sweetness theory and its application in the food industry (7)72
visions of the future in basic chemosensation research (8)58
visualization and structural analysis of fat crystal networks (9)46

Cider
cost of pasteurizing apple cider (1)50
unpasteurized juice: why is FDA taking chances with food safety? (8)180

Cleaning
cleaning and sanitizing (3)82

Coffee
characterizing coffee beans with chromatography (2)75

Colors
interview with a color expert (6)76
natural colors: pigments of imagination (6)70

Coming Events
(1)28; (2)28; (3)22; (4)32; (5)38; (6)32; (7)30; (8)32; (9)32; (10)32; (11)32; (12)36

Computers
computer-aided engineering in food process and product design (10)44
food formulation system (4)92
IFT's corner of the Web (12)96
silicon chips: food trend for the new millennium (12)54
software for the food industry (12)78
very sensory testing (3)76

Confectionery
confectionery marketing changes require new packages (4)102

Consumers (also see Consumer Trends column)
food industry forecast: consumer trends to 2020 and beyond (1)37
home food safety (2)54
new single-service packages serve growing consumer needs (9)114
new sophistication marks school lunch and breakfast programs (9)60
no rejoicing with *Joy of Cooking* (4)140
USDA surveys show what Americans eat (11)50

Consumer Trends column
a very healthy turnout (8)26
beauty not only skin deep (6)26
dine on, dine up (12)30
get up and go (2)24
going to the dogs? (10)26
lessons from labels (9)24
manufacturers must address the "front end" (11)26
moving to minerals (3)18
one big fat market (4)28
organics: grown by the book (5)32
way beyond burritos (7)24

Core competencies
how major core competencies affect development of hot new products (12)46

Corrections
(9)147; (11)129

Cosmeceuticals
beauty not only skin deep (6)26

Crystals
visualization and structural analysis of fat crystal networks (9)46

Dairy products
an interview with Elsie (2)63
fractionated milk fat: composition, structure, and functional properties (2)33
got more milk? (2)22
ice cream challenges (9)106

Death notices (see In Memoriam)

Demographics
increasing diversity in IFT: from the glass ceiling to mentoring (6)58
1997 IFT membership employment & salary survey (4)63

Diet
get up and go (2)24
one big fat market (4)28
USDA surveys show what Americans eat (11)50

Disinfectants
chemical by-products of chlorine and alternative disinfectants (4)58

Distribution
minimally processed foods demand maximum research and education (5)62

Diversity
increasing diversity in IFT: from the glass ceiling to mentoring (6)58

Drying
microwave and radiofrequency drying (11)84

Eastern Food Science Conference
(2)86

Editorial (also see President's Page)
a new directory to serve you better (8)10
Annual Meeting is coming—take action now! (11)10
IFT's corner of the Web (12)96
task force addresses leadership through education (5)10

Education
minimally processed foods demand maximum research and education (5)62
recruiting food scientists to lead the food sector in the next century (2)104
task force addresses leadership through education (5)10

Education News column
Anheuser Busch endows brewing science professorship at UC-Davis (1)94
California food industry endows scholarship fund at Cal Poly (1)94
Carpenter and Lillard retire from Georgia's food science faculty (2)87
Chapman gets grant to study food irradiation (3)100

Clark joins Washington State food science faculty (6)116
Cornillon joins Purdue's Food Science Dept. (1)94
Coupland joins Penn State faculty as assistant professor (4)118
DMI launches student dairy ingredients contest (12)92
FMI partners Portland State U. in executive development program (9)140
Georgia Tech's Distance Learning Center offers graduate programs (7)120
Goodrich joins citrus research faculty at the U. of Florida (8)155
Haard receives Earl P. McFee Award (3)100
HACCP training kit available from SIU (8)154
Hernandez heads up fats and oils program at Texas A&M (4)118
Holt named interim director of Missouri's Value-Added Agricultural Outreach Office (10)100
Hotchkiss gives Frazier Memorial Lecture at U. of Wisconsin (8)154
IIT/NCFST offer new graduate program in food process engineering (8)154
IIT offers graduate program in food process engineering (6)119
Iowa–Illinois soybean research consortium formed (7)120
Iowa State offers video conference on nutritional supplements—April 16 (2)87
Kansas State holds Excellence in Food Science Day (12)101
Michigan State forms GREEEN alliance with State of Michigan (6)116
Muthukumarappan joins agricultural engineering faculty at S. Dakota State (2)87
NCSU constructs new R&D Marine Sciences Center (12)92
1997 Ockerman Award presented to two Taiwanese students (2)87
1999–2000 sensory science scholarship announced (12)101
Oblinger appointed Dean at North Carolina State (1)94
Oklahoma adds to high-tech development initiative (7)120
OSU dedicates two new buildings to seafood research (10)100
Penn State names Zoumas the Alan R. Warehime Professor of Agribusiness (6)116
Penn State uses cloning technology to improve cocoa plants (7)120
PSU launches two endowments for Food Industry Leadership Center (9)140
Santerre joins Purdue faculty (9)140
Schmidt receives IAMFES Educator Award (12)101
Shahidi receives McFee seafood award (10)100
Shelhammer joins Ohio State food engineering faculty (2)87
Shetty receives 1999 APCN's outstanding science award (8)154
Tappenden joins U. of Illinois faculty of Food Science and Human Nutrition (1)94
U. of Illinois to celebrate 50 years of food science (8)155
U of Missouri to update biological engineering program (12)101
U. of Tennessee initiates maintenance and reliability program (4)118
UN-L's Food Processing Center offers entrepreneurial program (8)155
Wagner named Endresen Lecturer at U. of Mass (6)116
Warthesen named head of food science and nutrition at Minnesota (7)120

Employment
increasing diversity in IFT: from the glass ceiling to mentoring (6)58
job market, and Expo (8)28
recruiting food scientists to lead the food sector in the next century (2)104

Encapsulation
encapsulated ingredients: providing the right fit (12)70

Engineering (see Processing)

Enzymes
challenges to biocatalysis from flavor chemistry (2)40
enzyme developments (8)122
specialty enzymes from marine organisms (7)64

Ethnic foods
way beyond burritos (7)24

Fat and fat replacers
an interview with elsie (2)63
fat replacers (3)47
fat replacers: part of a bigger picture (3)16
trans fatty acids: a health paradox? (3)120
visualization and structural analysis of fat crystal networks (9)46

Fellows of the Institute
Bidlack, W.R.; Brooks-Ray, G.; Carpenter, J.A.; Lee, K.; Root, W.H.; Spiess, W.E.L.; Stier, R.F.; Swanson, M.A.; Swartzel, K.R. (8)94

Fermentation
meat fermentation research opportunities (9)52

Fiber
fiber has a strong supporting role in nutraceutical movement (7)90

Flavor
challenges to biocatalysis from flavor chemistry (2)40
retention and release of aroma compounds in foods containing protein (5)68
special report: GRAS flavoring substances 18 (9)65

Food and Drug Administration (see Laws & Regulations)

Food Expo (see IFT Annual Meeting & Food Expo)

Food safety
CAST weighs in on IFT's guiding principles for food safety oversight (5)240
cost of pasteurizing apple cider (1)50
EPA's implementation of the Food Quality Protection Act (11)148
FDA contract represents paradigm shift for IFT (12)8
guiding principles for optimum food safety oversight and regulation in the United States (5)30
home food safety (2)54
microbiological quality and safety (2)57
much ado about food safety in Codex (12)28
President's Council on Food Safety (10)124
Safe Food Act of 1997 (1)112
special report: GRAS flavoring substances 18 (9)65
unpasteurized juice: why is FDA taking chances with food safety? (8)180

Foodservice
dine on, dine up (12)30
IFT and the National Restaurant Association—a strategic alliance (4)10
new sophistication marks school lunch and breakfast programs (9)60

Formulation
a food formulation system (4)92

Fortification
addressing functional problems in fortified foods (7)38

Annual Meeting is coming—take action now! (11)10
calls and guidelines for 1999 IFT Annual Meeting (10)65

IFT News
AATA to sponsor 8th Congress, 1st Symposium, and Suppliers' Fair in Argentina (11)110
about the new IFT membership directory (12)88
and this year's nominees are . . . E. Larmond and M.K. Schmidl (12)88
Barbosa-Cánovas receives WSU Researcher of the Year Award (5)192
Bell named IFT Riester-Davis awardee (8)143
Bourne named Inaugural Fellow in special honor (10)96
Bradley and Floros named IFT Councilor Representatives (3)88
Butler and Serfling join IFT staff (5)186
call for abstracts for the 1999 Annual Meeting volunteered technical papers (9)125
call for forums (12)88
call for 1999 symposia proposals (8)140
call for nominations for IFT Achievement Awards (9)125
call for nominations—1999 W.O. Atwater Memorial Lecture (10)96
call for nominations of Fellows of the Institute (9)126
call for papers for new products and technologies sessions (11)104
Clausis invest $100,000 in IFT Foundation (8)140
CROs discuss research policy at IFT Annual Meeting (9)128
editor's note . . . (4)112
emeritus members receive 50-year pins (4)106
Food Technology redesign wins ASBPE award (7)116
Food Technology wins ASAE kudos (1)92
Forty-niners present Morris with coveted leadership award (7)116
Gerber Foundation endows $60,000 fellowship award (8)144
Hasler receives Soybean Association's Friend of Agriculture award (2)82
IFIS food science and technology information seminar offered June 20 (3)92
IFT and IFIS sign database agreement (10)95
IFT and Latin American group sign agreement (3)88
IFT Basic Symposium to address flavor chemistry and technology (3)92
IFT calls for 1999 media fellowship applicants (11)104
IFT career guidance honors student scientists (8)144
IFT Foundation endowment fund defined (12)89
IFT Minimum Standards 2002 discussed at Annual Meeting forum in Atlanta (10)94
IFT offers continuing education prior to

1998 Annual Meeting in Atlanta (3)91
IFT offers continuing education via CD-ROM (12)89
IFT offers science policy fellowship (10)96
IFT teleconference held on food safety in new product development (7)115
IFT to provide technical expertise to FDA (11)104
IFT welcomes new staff members Quek and Chamberlain (10)95
In Memoriam: Ben F. Buchanan, IFT President 1972-73 (6)114
In Memoriam: Paul F. Hopper, IFT President 1989-90 (6)114
inventor of HACCP honored with GMA food safety award (7)116
Karel receives honorary doctorate from university (1)89
Keeney named 1998 Penn State Distinguished Alumnus (6)112
Lechowich named Harold Macy Award winner (5)188
Manley chosen IFT President-Elect for 1998-99 (7)114
Manley chosen IFT's next President-Elect (4)106
Marth named Fellow of ADSA and IAMFES (12)90
Martinez receives Presidential Rank Award (7)117
Minnesota Section seeks nominees for 1999 Harold Macy Award (11)110
Morris recognized at SAAS with professional award (4)108
Nielsen and Davidson elected IFT membership representatives (6)110
nutraceuticals—A very hot topic (3)96
Ockerman receives Gamma Sigma Delta award (4)106)
Onwulata, Grimm win USDA's Early Career award (2)81
Paredes-López appointed director of research center in Mexico City (4)112
Parish named as IFT Congressional Science Fellow (7)116
Powell to keynote IFT Annual Meeting opening session June 20 in Atlanta (5)186
Powers establish scholarship through IFT Foundation (8)143
Rahman receives HortResearch Chairman's Award (11)110
Scholes named 1998 Brampton Woman of Achievement (8)145
SCIFT to offer Bates scholarships for 1998-99 (2)80
seeking employment? trying to fill a position? IFT's Employment Bureau and Career Fair can help (3)92
Shank, Levitt asume FDA management positions (3)88
Sizer appointed Director of National Center for Food Safety & Technology (6)110
Stillings becomes IFT's 1998-99 President (7)114
Surak named ASQ Fellow (8)143
Szczesniak receives honorary doctorate from Poznan U. (4)108
task force expands interest in Education to lifelong learning (10)95
three timely Hot Topic sessions planned for Atlanta! (1)89
USDA research agency names Betschart new director for western states (6)110
Von Elbe retires after 35 years at Wisconsin (9)126
Wagner moves to Taco Bell in California (6)110
we say goodbye to IFT staffers Tepper and Willey (2)80
World Food Prize symposium to discuss "Urbanization and Food Security" (9)126
Woteki elected new IOM member (12)90

IFT Newsmakers column

Annual Meeting & Food Expo glowed in the media (10)106
bytes about food frights and eating right (12)104
food for thought, health, and disease prevention (4)116
food safety not just for the birds during Thanksgiving (1)95

fat-free and reduced-fat reach maturity (3)54
how international companies use research teams (4)40
how major core competencies affect development of hot new products (12)46
improving the success of new product development (1)46
new rules for success in food research (5)78
science gives specialty juice a big slice of the market (11)44
sensory testing rediscovered as key to new product success (4)26
specialty enzymes from marine organisms (7)64

Products & Technologies
(1)70; (2)83; (3)62; (4)74; (5)139; (6)70; (7)90; (8)102; (9)94; (10)66; (11)72; (12)70

Pulsed electric field processing
interest in pulsed electric field processing increases (1)81

Quantitative Descriptive Analysis
Quantitative Descriptive Analysis: developments, applications, and the future (8)48

Rancidity
minimizing rancidity in muscle foods (10)54

Recruitment
recruiting food scientists to lead the food sector in the next century (2)104

Refrigerated foods
extending the shelf life of refrigerated foods: for better or worse? (2)20

Regional Section & Division Meetings
(1)92; (2)84 ; (3)94; (4)108; (5)192; (6)112; (7)117; (8)149; (9)134; (10)97; (11)112; (12)92

Regional Section & Division News
(1)89; (2)81; (5)188; (7)117; (8)147; (9)134; (10)97; (11)110; (12)90

Regulations (see laws & regulations)

Research
CROs discuss research policy at ift annual meeting (9)128
food science speaks out on research and regulation (6)24
meat fermentation research opportunities (9)52

Rheology
new design allows effective on-line rheological measurement (9)118
visualization and structural analysis of fat crystal networks (9)46

Salary
1997 IFT membership employment & salary survey (4)63

Sanitation
chemical by-products of chlorine and alternative disinfectants (4)58
cleaning and sanitizing (3)82

School feeding
new sophistication marks school lunch and breakfast programs (9)60

Science Communications column
blurry boundaries (8)24
do "functional foods" offer opportunities to optimize nutrition science and health? (11)24
extending the shelf life of refrigerated foods: for better or worse? (2)20
fat replacers: part of a bigger picture (3)16
food science speaks out on research and regulation (6)24
guiding principles for optimum food safety oversight and regulation in the United States (5)30
IFT Fellow prepares Congressional hearing on food safety (7)22
jumping in with both feet (1)22
my year in the Senate: a retrospective analysis (10)24
single food regulatory agency: can it happen? (4)24
so you want IFT's name, do you? (9)22

Scientific Status Summary
fat replacers (3)47
functional foods: their role in disease prevention and health promotion (11)63
microbiological quality and safety (2)57

Seafood
freezing seafood (2)72

Sensory evaluation
evolution of the sensory science discipline (8)42
foundations of sensory science and a vision for the future (7)78
harmonizing sensory evaluation internationally (4)52
neural networks and the future of sensory evaluation (8)62
Quantitative Descriptive Analysis: developments, applications, and the future (8)48
sensory testing rediscovered as key to new product success (4)26
sensory texture profiling—historical and scientific perspectives (8)54
sensory testing and analysis of pet foods (10)85
sweetness theory and its application in the food industry (7)72
very sensory testing (3)76
visions of the future in basic chemosensation research (8)58

Services
many services offered at food expo (5)180

Shelf life
extending the shelf life of refrigerated foods: for better or worse? (2)20

Snacks
anything's possible. Just ask Green Bay (3)62
take a snack on the wild side (11)72

Societies & Associations
AAAS confers awards; elects Stephen Jay Gould as president-elect (3)11
AAAS marks 150th anniversary; emphasizes global science (4)22
AAAS report outlines Cuba's biotechnology efforts (11)22
ADPI honors Brenne with Award of Merit (7)18
ADSA presents awards to scientists (11)22
AFFI's CEO and Staff Counsel earn CAE designtions (9)18
AIB/ABA design environmental services for bakeries; also offers CD-ROM on maintaining HACCP changes (12)23
AIB offers/receives in various transactions (7)18
Alaskan "Symphony of Salmon" product contest set for January (11)20
Almond Pest Management Alliance works toward reduced pesticide risk (9)16
American Association of Cereal Chemists announces 1998 awards (12)24
American Public Health Association builds new headquarters (7)18

AMI releases *Meat and Poultry Facts* 1998 (12)24
AMSA announces 1998 award recipients (10)18
AMSA announces 1998 Outstanding Undergraduate Award recipients (8)22
Analytical Chemists offer $20,000 grant (2)16
AOCS calls for nomination for the Chang Award (10)18
AOCS calls for nominees for the Supelco/Pelick Research Award (10)18
AOCS changes name of check sample program; introduces new series (10)20
AOCS names Chang and Supelco/Pelick award winners (4)22
ASM offers visiting professorships and research fellowships (1)20
ASTM celebrates 100th anniversary (4)22
ASTM develops system for on-line standards development (7)18
Balaban receives IAFIS-FPEI food engineering award (10)20
BISSC offers exanded certification; elects officers (6)20
Canned Food Alliance plans increased in-store presence (10)18
Catlin receives ASTM Award of Merit (9)16
CRA/AACC award Outstanding paper and Poster to students (5)24
Cross receives AMI Industry Advancement Award (12)23
DMI staffs toll-free technical assistance line with food technologist (9)16
EPRI Food Technology Alliance moves (7)18
Federation of Animal Science Societies formed (4)21
First IDF Award given to jean-Louis Maubois of INRA (11)22
FMI Foundation launches campaign to educate consumers in food safety (9)16
food stamps to carry messages from Food Guide Pyramid (11)22
Food Research Institute receives NFPA food safety award (8)22
FPA forms Stretch Film Manufacturing Council (4)22
fruit juice producers call for papers (2)16
GMA, FMI, and AFBF to launch consumer education program on irradiation and food safety Graham selected to receive ISCC's Nickerson Service Award (10)20
Hulse honored with Environment Protection Award (11)23
IAFIS Foundation honors Balaban; awards two fellowships (6)20
IAFIS is busy with assorted activities (12)24
IAMFES inducts seven for new Fellows award (9)16
IEST call for papers issued (8)66
IEST requisitions draft standards for ISO TC 209 (8)64
IFIC offers guidelines to communicating emerging science (4)21
IFST (UK) launches 4th edition of Guide to GMPs (7)20
ISA seeks new Executive Director (8)22
meat associations honor H. Kenneth Johnson (7)20
meat secretariat offers prize for best essay on meat safety challenges (4)21
National Chadian Assn. of Gum Exporters charter members visit U.S. (12)26
NCA introduces Confectionery Executive Education Program (10)20
NCGA lobbies for Plant Genome Initiative (7)18
NCGA names 47 growers to newly formed Corn Action Teams (5)24
NCGA takes leading role in Renewables Vision 2020 (12)24
NCGA to pursue grassroots trade campaign (11)20
new association formed to provide food safety expertise (11)22
NFPA presents Food Leadership Award to members of Congress (2)18
NMA develops food safety guidelines for ground beef (6)20
NMA Scholarship Foundation announces 1998-99 grant recipients (10)20
nominations requested for Keene P. Dimick Award for Chromatography (1)20
NRA creates HACCP trainingprogram for foodservice operations (4)22
NRA's Educational Foundation awards scholarships (8)64
NRA's Educational Foundation forms Advisory Council (7)18
NRA endorses 1997 FDA Food Code (1)20
NRA unveils major managment initiative (8)22
NRC seeks applications for senior research associateships (2)16
organic farming foundation receives $10,000 donation (6)20
poultry partnership offers free food safety information kit (6)20
R&DA's Isker Award goes to government-industry team (2)18
Schuman receives American Egg Board research award (12)23
September is National Food Safety Education Month, says IFSC (9)16
SFA inducts three into Circle of Honor (6)20
SME publishes 1998 machine vision directory (5)24
TAPPI gives merit awards (11)22
Texas A&M wins AMSA Eastern Collegiate Meat Judging Contest (12)24
universities, ARS form National Alliance for Food Safety (10)20

Soy
American Soy Products expands soymilk facility (11)14
that's using the old bean (6)42

Space feeding
NASA experiments with food for interplanetary travel (6)12

Student competition winners & finalists
(8)100

Sweeteners
new sweeteners redefine diet beverage market (9)26
sucralose approval sweetens low-cal market (5)34
sweetness theory and its application in the food industry (7)72

Tea
we all scream for . . . green tea? (6)28

Technology
how major core competencies affect development of hot new products (12)46

Texture
sensory texture profiling—historical and scientific perspectives (8)54

Trends
food industry forecast: consumer trends to 2020 and beyond (1)37

Washington News
(1)26; (2)26; (3)20; (4)30; (5)36; (6)30; (7)28; (8)30; (9)28; (10)30; (11)30; (12)34

World food availability
world food security: the role of postharvest technology (1)64

World Food Prize
World Food Prize awarded to seedsman (12)14

Book Review Index

Food Technology, Volume 52, 1998

The issue number appears in parentheses, followed by the page number.

Additives & Ingredients, including flavors, colors, fragrances, and nutrients

Industrial Enzymes and Their Applications. Helmut Uhlig. (12)106

New Technologies for Healthy Foods & Nutraceuticals. Manssur Yalpani, ed. (3) 102

Agriculture, including agribusiness, aquaculture, horticulture, & hydroponics

Food Processing: An Industrial Powerhouse in Transition, 2nd ed. John M. Connor and William A. Schiek. (3) 101

Policy Controversy in Biotechnology: An Insider's View. Henry I. Miller. (8) 159

Analysis & Instrumentation

Food Microbiological Analysis: New Technologies (IFT Basic Symposium Series). Mary Lou Tortorello and Steven M. Gendel, eds. (4) 118

Lipid Technologies and Applications. Frank D. Gunstone and Fred B. Padley, eds. (8) 159

Water in Foods and Biological Materials: A Nuclear Magnetic Resonance Approach. R. Roger Ruan and Paul L. Chen. (12)106

Biotechnology, including enzymes, fermentation, & genetic engineering

Food Microbiological Analysis: New Technologies (IFT Basic Symposium Series). Mary Lou Tortorello and Steven M. Gendel, eds. (4) 118

Industrial Enzymes and Their Applications. Helmut Uhlig. (12)106

Policy Controversy in Biotechnology: An Insider's View. Henry I. Miller. (8) 159

The Biotech Century: Harnessing the Gene and Remaking the World. Jeremy Rifkin. (7) 123

Cereals, Baked Goods, & Carbohydrates

Foods: A Scientific Approach. Helen Charley and Connie Weaver. (7) 123

Chemistry, including biochemistry and physical chemistry of foods

Food Lipids: Chemistry, Nutrition, and Biotechnology. Casimir C. Akoh and David B. Min. (11) 125

Foods: A Scientific Approach. Helen Charley and Connie Weaver. (7) 123

New Technologies for Healthy Foods & Nutraceuticals. Manssur Yalpani, ed. (3) 102

Phytochemistry of Fruit and Vegetables. F.A. Tomás-Barberán and R.J. Robins. (3) 101

Confectionery Products

Foods: A Scientific Approach. Helen Charley and Connie Weaver. (7) 123

Dairy Products

Foods: A Scientific Approach. Helen Charley and Connie Weaver. (7) 123

Eggs & Egg Products

Foods: A Scientific Approach. Helen Charley and Connie Weaver. (7) 123

Engineering, Processing, & Pollution Control

Fish Processing Technology, 2nd ed. G.M Hall, ed. (7) 123

Food Canning Technology. Jean Larousse and Bruce E. Brown, eds. (5) 202

Food Engineering 2000. Pedro Fito, Enrique Ortega-Rodriguez, and Gustavo V. Barbosa-Cánovas. (9) 146

Food Processing: An Industrial Powerhouse in Transition, 2nd ed. John M. Connor and William A. Schiek. (3) 101

Industrial Enzymes and Their Applications. Helmut Uhlig. (12)106

Nonthermal Preservation of Foods. Gustavo V. Barbosa-Cánovas, Usha R. Pothakamury, Enrique Palou, and Barry G. Swanson. (4) 120

Fruits, Vegetables, & Legumes

Foods: A Scientific Approach. Helen Charley and Connie Weaver. (7) 123

Phytochemistry of Fruit and Vegetables. F.A. Tomás-Barberán and R.J. Robins. (3) 101

Policy Controversy in Biotechnology: An Insider's View. Henry I. Miller. (8) 159

The Biotech Century: Harnessing the Gene and Remaking the World. Jeremy Rifkin. (7) 123

History

Appetite for Life: An Autobiography of Samuel Goldblith. Samuel A. Goldblith. (11) 126

Laws & Regulations

HACCP User's Manual. Donald L. Corlett Jr. (12)108

Policy Controversy in Biotechnology: An Insider's View. Henry I. Miller. (8) 159

Marketing

Food Marketing: An International Perspective. David J. Schaffner, William R. Schroeder, and Mary D. Earle. (11) 122

Microbiology

Foodborne Microorganisms of Public Health Significance, 5th ed. A.D. Hocking, G. Arnold, I. Jensen, K. Newton, and P. Sutherland, eds. (11) 120

Food Microbiological Analysis: New Technologies (IFT Basic Symposium Series). Mary Lou Tortorello and Steven M. Gendel, eds. (4) 118

New Technologies for Healthy Foods & Nutraceuticals. Manssur Yalpani, ed. (3) 102

Nonthermal Preservation of Foods. Gustavo V. Barbosa-Cánovas, Usha R. Pothakamury, Enrique Palou, and Barry G. Swanson. (4) 120

The Microbiology of Meat and Poultry. Andrew Davies and Ron Board, eds. (8) 159

Water in Foods and Biological Materials: A Nuclear Magnetic Resonance Approach. R. Roger Ruan and Paul L. Chen. (12)106

Muscle Foods, including meat, fish, seafood, shellfish, & poultry

Fish Processing Technology, 2nd ed. G.M Hall, ed. (7) 123

Foods: A Scientific Approach. Helen Charley

and Connie Weaver. (7) 123
The Microbiology of Meat and Poultry. Andrew Davies and Ron Board, eds. (8) 159

Nutrition, Diet & Health
Food Lipids: Chemistry, Nutrition, and Biotechnology. Casimir C. Akoh and David B. Min. (11) 125
Implementing Dietary Guidelines for Healthy Eating. Verner Wheelock, ed. (1) 96
New Technologies for Healthy Foods & Nutraceuticals. Manssur Yalpani, ed. (3) 102

Oils, Fats & Lipids
Food Lipids: Chemistry, Nutrition, and Biotechnology. Casimir C. Akoh and David B. Min. (11) 125
Foods: A Scientific Approach. Helen Charley and Connie Weaver. (7) 123
Lipid Technologies and Applications. Frank D. Gunstone and Fred B. Padley, eds. (8) 159
New Technologies for Healthy Foods & Nutraceuticals. Manssur Yalpani, ed. (3) 102

Packaging
New Technologies for Healthy Foods & Nutraceuticals. Manssur Yalpani, ed. (3) 102

Popular Books on Food Science & Technology
Appetite for Life: An Autobiography of Samuel Goldblith. Samuel A. Goldblith. (11) 126
Food Fundamentals, 7th ed. Margaret McWilliams. (12)106
Implementing Dietary Guidelines for Healthy Eating. Verner Wheelock, ed. (1) 96
The Biotech Century: Harnessing the Gene and Remaking the World. Jeremy Rifkin. (7) 123

Preservation
Food Canning Technology. Jean Larousse and Bruce E. Brown, eds. (5) 202
Nonthermal Preservation of Foods. Gustavo V. Barbosa-Cánovas, Usha R. Pothakamury, Enrique Palou, and Barry G. Swanson. (4) 120
The Microbiology of Meat and Poultry. Andrew Davies and Ron Board, eds. (8) 159

Proteins
Foods: A Scientific Approach. Helen Charley and Connie Weaver. (7) 123

Quality Assurance & Sanitation (including HACCP)
Fish Processing Technology, 2nd ed. G.M Hall, ed. (7) 123
Good Manufacturing Practices: Tape 1—Sources and Control of Contamination During Processing; Tape 2—Personal Hygiene and Practices in Food Manufacturing. Arnold S. Roseman. (9) 145
HACCP User's Manual. Donald L. Corlett Jr. (12)108
Quality in Frozen Food. Marilyn C. Erickson and Yen-Con Hung, eds. (3) 102

Reference Books, including dictionaries, encyclopedias, directories, bibliographies, and handbooks
HACCP User's Manual. Donald L. Corlett Jr. (12)108
Lipid Technologies and Applications. Frank D. Gunstone and Fred B. Padley, eds. (8) 159

Refrigerated & Frozen Foods
Quality in Frozen Food. Marilyn C. Erickson and Yen-Con Hung, eds. (3) 102
The Microbiology of Meat and Poultry. Andrew Davies and Ron Board, eds. (8) 159

Sensory Evaluation
Food Fundamentals, 7th ed. Margaret McWilliams. (12)106
Food Lipids: Chemistry, Nutrition, and Biotechnology. Casimir C. Akoh and David B. Min. (11) 125
Foods: A Scientific Approach. Helen Charley and Connie Weaver. (7) 123
Sensory Evaluation of Food: Principles and Practices. Harry T. Lawless and Hildegard Heymann. (3) 102

Toxicology & Food Safety
Foodborne Microorganisms of Public Health Significance, 5th ed. A.D. Hocking, G. Arnold, I. Jensen, K. Newton, and P. Sutherland, eds. (11) 120
Foods: A Scientific Approach. Helen Charley and Connie Weaver. (7) 123
New Technologies for Healthy Foods & Nutraceuticals. Manssur Yalpani, ed. (3) 102

World Food Problems
Food Marketing: An International Perspective. David J. Schaffner, William R. Schroeder, and Mary D. Earle. (11) 122
Policy Controversy in Biotechnology: An Insider's View. Henry I. Miller. (8) 159
